

HDI ACS-35 AMPLIFIER (3, 4, 5 & 6 Wire Systems)

The ACS-35 is a versatile single model universal amplifier for use with 3, 4, 5 or 6 wire common intercom systems. The ACS-35 provides amplification, control, signaling circuitry to operate a complete apartment intercom system.

STANDARD FEATURES

- Tone and Voice Volume Controls
- Steady or Warble Call Tones
- Warble Entrance Tone Option
- AC or Dc Door Operation
- Time Release Options
- Separate Postal Lock Door Release Options
- Compact Size 7.25" (L) x 3.5" (W) x 1.25" (H)
- Screw Terminations with Pressure Pads

The ACS-35 is a universal amplifier that replaces all current 3, 4, 5 and 6 wire amplifiers.* It utilizes the ACS-PS Tri volt transformer. The ACS-35 provides amplification, outside door to apartment signaling and lobby door release control.

The ACS-35 has a stylized custom molded case with easy to read lettering. The case is lightweight yet durable with a thick .125" ABS plastic wall. Mounting tabs are standard for easy surface mount.

Field wires terminate to a terminal block with screw terminals and pressure plates. Rugged voice and tone volume controls are easily adjustable through the screw driver slots on the front of the case. Programmable dip switches are provided for apartment or postal lock delayed action door release options 8 or 16 seconds and for warble tone in lobby panel speaker.

* (some older Nutone systems)
